Subject: SANITIZER TIFON – CERTIFICATE FOOD CONTACT

MP HYGIENE certifies that the product:

SANITIZER Gel hydroalcoolique de marque TIFON

Can be used for hand friction in food environments.

The actives substances of this product are either authorized for hand use TP1 or are among the substances under review within the framework of the biocidal regulation for TP1.

These active substances evaporate after use and do not leave any residue.

The product has passed the required standards as specified by the norm EN 14885 relating to chemical antiseptics and disinfectants.

In addition, although the product is not intended to be applied on surfaces, it voluntarily complies with French restrictions on chemicals used on materials and objects that may come into contact with food : it complies with decree no.73-138 of February 12, 1973 and its modifications.

To know :

- The product doesn't contain :
 - o enzymatic preparation ;
 - o product derived from animal or plant tissues infested by parasites, pathogens or their toxins, and unfit for human consumption;
 - o dangerous substance classified as carcinogenic, mutagenic or toxic for reproduction category 1 or 2.
- The product only contains constituents listed in the decrees of September 8 and December 19, 2013 relating to cleaning products for materials and objects that may come into contact with food.
