Models and accessories that match your needs

The membrane tank of the CA/BA 340 (15 and 30 litre versions) is equipped with a drain hose for discharge into a bucket or gully. When empty, the tank is easily removed for cleaning. The membrane-tank version is just as compact and manoeuvrable as the two-tank version (same width and length, but slightly taller).

Local service and maintenance

Choose between a nylon brush (in soft or medium stiffness) or an optional silicon carbide brush, depending on the job. You can individually adjust the brush pressure, so that any surface is cleaned effectively.

The best way to keep your CA/BA 340 automatic cleaner in peak condition is with a Nilfisk service contract. It includes preventive maintenance and ensures that, should anything go wrong, it will be fixed promptly by a professional.

Our customer support department is in direct contact with a staff of field service engineers who carry parts and accessories. They can also perform routine service and maintenance on the spot. With a Nilfisk service contract, you not only minimise the risk of expensive downtime, but you also protect your investment by maximising the life of your equipment.

The smart alternative to mopping

Sparklin clean floors, without the hassle

Twice as fast as mopping

If you dislike cleaning floors, you'll love the Nilfisk CA/BA 340. With just a light touch of the finger, this mini scrubber/dryer glides into action, leaving your floors spotless. There's no slippery residue, no aching back. Just a clean, dry surface.
The Nilfisk CA/BA 340 is ideal for the daily maintenance of any hard floor that can be wet cleaned. Cleaning contractors will appreciate the light weight and portability of the CA 340 (230V power) with a choice of twin and membrane tanks. And for those who prefer battery operation, the BA 340 cleans up to 700 m^2 on a single charge. Finally, the CA 340ET offers all the qualities of the CA 340, but with an extra large tank capacity for cleaning up to 400 m^2 of floor space without refilling

Productive

User friendly

Quiet

Easy to service

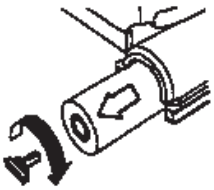

Benefits of the CA/BA 340 scrubber/dryers

- Cleans up to 400m^2 an hour - twice as fast as mopping, and with far better results.
- Leaves stone, tile, cement, marble, rubber, vinyl and sealed wood floors spotless.
- Dries as it cleans, leaving a slip-free surface.
- Simple controls are easy to see and reach.
- Unique design permits cleaning under furniture and right up to the wall's edge.
- Manoeuvrable and compact.
- Handle adjusts to the hight of any user and folds away for easy storage.
- Quiet operation.
- Choice of 3 brushes, with individually adjustable pressure to ensure thorough cleaning - even on an uneven surface.

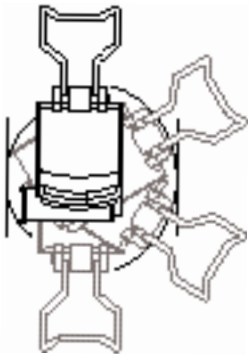

It's easy

Vertical brush rotation and double squeegee maximise scrubbing and drying power.

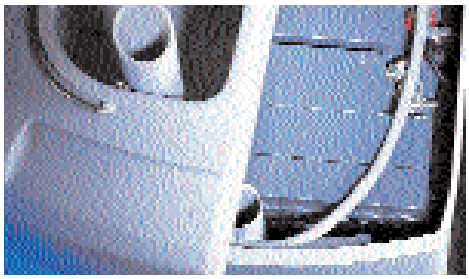

The compact CA/BA 340 turns at the touch of a finger for total manoeuvrability.

With the twin-tank version of the CA/BA 340 scrubber/ dryer, the job of filling, cleaning and emptying the tanks is extra quick and easy. You don't need a bucket — just leave the unit where it is and carry the tanks to the nearest toilet or sink. You can clean up to 150 m^2 and 200 m^2 respectively before refilling.

The BA 340 comes with maintenance-free (sealed) batteries, an optional built-in battery charger and an LED charge indicator. The battery pack is easily accessible, allowing a quick change to a spare set for doubled capacity. To recharge simple connect the cable to a mains outlet.

The unique nozzle head of the CA/BA 340 scrubber/dryer allows you to clean under furniture, right up to the wall's edge. And with a squeegee on both sides of the brush, you get equally effective drying when moving forward or backward, or turning.

Simple, clearly marked controls are within easy reach of the user. Convenient foot pedal raises and lowers brush. The adjustable handle adapts to fit any person.

Safe to use during business hours

If you're using a mop, you're probably spending about two hours to clean every 300 m^2 of floor, and having to wait until after business hours. With a CA/BA 340 scrubber/dryer, you can clean that same area — much better, and during business hours — in half the time or less. Because the CA/BA 340 picks up all water in a single pass as you clean, there's no slipping hazard. Plus, it's extra quiet so that the disruption of activity in surrounding areas is minimal.
