

Product data sheet

Description

Arvox Pro Grout + Tile cleans mineral and silicone-based grout, ceramic tiles, porcelain stoneware indoors and outdoors. Removes organic soiling such as detergent residues, care product residues and body fats without attacking the surfaces.

Product advantages

- **Effective:** easy & fast application
- **Innovative:** active oxygen dissolves the dirt
- **Environmentally neutral:** reaction products are biodegradable
- **Clean:** without chlorine, silicones, alcohol, perfume, aldehydes

Application

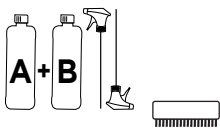

Preparation: Remove loose dirt from the surface. If necessary, cover surfaces that are not to be treated. May affect metals. Test product on a less visible spot.

Manual application: Spray the surface to be cleaned thoroughly with Arvox Pro A and wet completely. Then apply Arvox Pro B in the same way and work it in with a grout brush, cleaning pad or scrubber. Rinse/rework the treated surface with water and brush after approx. 5-15 minutes.

Machine application: Apply Arvox Pro A and B one after the other to the floor with a low pressure sprayer. Leave on for approx. 5 - 10 minutes, depending on the degree of soiling. Clean the entire surface with a cleaning machine and a suitable cleaning pad. Thoroughly vacuum the treated floor, rinse with clean water and vacuum again, if necessary.

Note: Apply Arvox on a dry surface. Do not use in strong sunlight or moisten the surface slightly if necessary.

Coverage: approx. 5-10m²/L (0,5 L per component)

Manual application:

The components are worked in with a brush or cleaning pad.

Machine application:

Components should preferably be applied with eccentric cleaning machines and appropriate pads. For simultaneous application we recommend the use of double tank sprayers. (Available at Arva)

Containers/Sets

Bottles incl. spray heads

2x1L

Art.Nr.: 11020303

Canisters

2x2,5L

Art.Nr.: 11020308

2x10L

Art.Nr.: 20020305

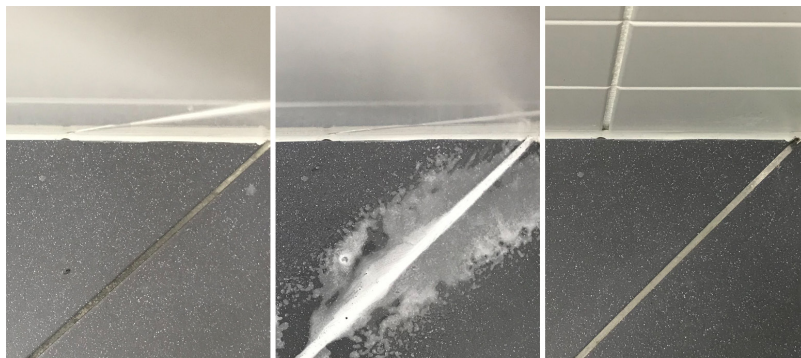

Handling and storage

Arvox Pro Grout + Tile has a shelf life of at least 24 months when stored in the original container as recommended. Store in a place accessible only to authorised persons. Store in a cool, dark and upright position. Heat as well as direct sunlight may impair the effectiveness of the product. Use up opened containers within 3 months. Use only clean spray heads or pressure sprayers. Dispose of product residues and containers in accordance with official regulations.

Safety measures

The usual safety precautions for handling chemicals should be observed. In particular, protective gloves, goggles, protective clothing and a mask should be worn. Detailed safety instructions can be found in the safety data sheets for Arvox Pro Grout + Tile A and B.

Grouts and tiles discoloured by cleaning and care product residues or body grease become hygienically clean again after treatment with Arvox Pro Grout + Tile.

Properties

Arvox Pro A

Contains (acc. to 1271/2008/EC) sodium hydroxide; (acc. to 648/2004/EC) not relevant.

Appearance	Clear
Colour	Colourless
Odour	Characteristic/alkaline
Density	1,106 g/cm ³
Dynamic viscosity	15 mPa.s
Boiling point	103°C
pH	14

Arvox Pro B

Contains (acc. to 648/2004/EC) 5% - <15% oxygen-based bleaching agent.

Appearance	Like water
Colour	Colourless
Odour	Very faint, characteristic
Density	1,026 g/cm ³
Dynamic viscosity	1,1 mPa.s
pH	3-4

Values measured at 20° C (unless stated differently).

DISCLAIMER Use Arvox Pro products at your own risk. Observe the product information and labels. Use only according to instructions. Check surface compatibility. Arva Greentech GmbH accepts no liability for any damage caused by the use of the Arvox Pro product line, including consequential damage that may result from incorrect storage or improper use of the product.
