

arvox PRO
PARQUET
+FLOORBOARDS

arvox
The 2 component cleaner

Product data sheet

Description

Arvox Pro Parquet + Floorboards cleans oiled and unsealed wooden floors. Removes organic soiling such as footprints and grease without attacking the surfaces. Ideal for basic cleaning and pre-treatment for subsequent care of the wood.

Product advantages

- **Effective:** Easy & fast application
- **Innovative:** Active oxygen dissolves the dirt
- **Environmentally neutral:** Reaction products are biodegradable
- **Clean:** Without chlorine, silicones, alcohol, perfume, aldehydes

Application

Preparation: Cover adjacent surfaces if necessary. Arvox Pro may affect metals. The colour of the wood may change after treatment. Transfer components A and B each into a low-pressure sprayer. Test on a less visible spot.

Manual application: Spray the surface to be cleaned thoroughly with Arvox Pro A and wet it completely. Immediately apply Arvox Pro B in the same way. Work in with a suitable cleaning pad or brush. Allow to react briefly and wipe up. Wipe thoroughly with clean water until all dirt residues have been removed.

Machine application: Apply Arvox Pro A and B one after the other to the wooden floor with a low-pressure sprayer. Allow to react briefly. Clean the entire surface with a single-disc machine and a suitable cleaning pad. Remove dirt with a scrubber-suction machine (roller brush and fresh water). After sufficient drying time, the floor can be re-treated. Follow the cleaning instructions of the floor manufacturer. Check surface compatibility on a less visible spot.

Note: Apply Arvox on a dry surface. Do not use in strong sunlight.

Coverage: approx. 3-8m²/L (0,5 L per component)

Manual application:
The components are worked in with a brush or cleaning pad.

Machine application:
Components should preferably be applied with eccentric cleaning machines and appropriate pads. For simultaneous application we recommend the use of double tank sprayers. (Available at Arva)

Handling and storage

Arvox Pro Parquet + Floorboards has a shelf life of at least 24 months when stored in the original container as recommended. Store in a place accessible only to authorised persons. Store in a cool, dark and upright position. Heat as well as direct sunlight may impair the effectiveness of the product. Use up opened containers within 3 months. Use only clean spray heads or pressure sprayers. Dispose of product residues and containers in accordance with official regulation.

Safety measures

The usual safety precautions for handling chemicals should be observed. In particular, protective gloves, goggles, protective clothing and a mask should be worn. Detailed safety instructions can be found in the safety data sheets for Arvox Pro Parquet + Floorboards A and B.

Arvox Parquet + Floorboards enables a new type of cleaning process for fast, noise- and dust-free renovation. The wooden surfaces are cleaned down to the fibres and can then be refinished.

Properties

Arvox Pro A

Contains (acc. to 1271/2008/EC) sodium hydroxide; (acc. to 648/2004/EC) not relevant.

Appearance	Clear
Colour	Colourless
Odour	Characteristic/alkaline
Density	1,021 g/cm ³
Dynamic viscosity	28 mPa.s
Boiling point	101°C
pH	12-13

Arvox Pro B

Contains (acc. to 648/2004/EC) 5% - <15% oxygen-based bleaching agent.

Appearance	Like water
Colour	Colourless
Odour	Very faint, characteristic
Density	1,026 g/cm ³
Dynamic viscosity	1,1 mPa.s
pH	3-4

Values measured at 20° C (unless stated differently).

DISCLAIMER Use Arvox Pro products at your own risk. Observe the product information and labels. Use only according to instructions. Check surface compatibility. Arva Greentech GmbH accepts no liability for any damage caused by the use of the Arvox Pro product line, including consequential damage that may result from incorrect storage or improper use of the product.
