

Porous Surface treatment

Descriptif

A ready-to-use, water-based, indoor/outdoor solution designed to provide stain resistance to porous materials.

pH: 4,3-5,3

Champ d'application

Natural stone, brick, unglazed ceramic tile and grout.

Mode d'emploi et dosage

1. Clean floor to be treated with Eclipse Neutral Cleaner according to label directions.
2. If the floor is heavily soiled, clean with Eclipse d-Limonene according to label directions.
3. Rinse floor thoroughly with water and allow to dry completely.
4. Fill pump-up sprayer with Eclipse Porous Surface Treatment to provide coverage of 4-7 m² per liter for medium to high porosity floors or 12-24 m² per liter for low porosity floors.
5. Spray floor completely with the spray head set to a medium spray. Do not apply solution so heavily that puddles are formed.
6. Highly porous surfaces such as concrete require a second treatment which may be applied after the first treatment is dry (10-30 minutes).

Note: Eclipse Porous Surface Treatment is ready to use. Do NOT dilute.
