

Patina discs - 15 cm / 6" - set of 6

GENERAL

With the introduction of the green patina discs, WOCA presents a new way to oil floors. By using the disc, floors can now be finished in one layer with the classic woca oil and paste and the surface is saturated, wear-resistant and silky smooth.

USAGE

The preparations (sanding, vacuuming, moistening) for finishing with WOCA oil and paste must be respected. The patina disc consists of one side with a very fine sanding grain and one side with a velcro layer that ensures that the disc remains under the pad. Two patina discs are placed opposite each other under the white pad. Apply the oil or paste evenly according to the applicable instructions. The rubbing is done by combining the pad and discs. This combination ensures that the oil or paste is quickly and evenly processed into the surface. If the floor is saturated and absorbs more, excess residue must be removed with a disposable mop. The floor can then be rubbed with new white pads. The result is a very saturated floor that feels soft, dries quickly and has a full appearance.

Consumption:

+/- 100 - 150m² per disc, depending on the type of wood and processing.

Patina discs - 15 cm / 6" - set of 6

TECHNICAL SPECIFICATIONS

Dimensions product (LxHxW) 19.2 x 1.3 x 15.9 cm

Danger of spontaneous combustion!

Due to the danger of spontaneous combustion,
soak cloths and pads that are soaked with oil with water.
After use, store and dispose of in a tightly closed container.
Clean tools after use with WOCA oil thinner.
