
Technical datasheet AA 810/1

Special features:

AA 810/1 shows excellent permanent tack characteristics after drying.

AA 810/1 has a good adhesion on non-woven materials and is developed to coat this material with a permanent tacky layer.

The adhesive has good application properties and is suitable for fully coating of the non-woven due to its excellent flow properties.

Technical data:

Composition	: Dispersion adhesive based on acrylates
Brookfield viscosity	: 35 mPa.s (HAT; spindle 1; 50 rpm; 20°C)
Solid content	: 43,0 %
PH	: 3,0
Colour	: white

Method of application:

Application by spraying systems

Cleaning:

Cleaning can be performed with water.

Storage:

Keep the containers closed and store preferably at roomtemperature.

The adhesive is sensitive to frost.

The shelf life is 6 months.
